TOP OF THE RANGE

The new model Skylife
of the bioclimatic
range Kedry.

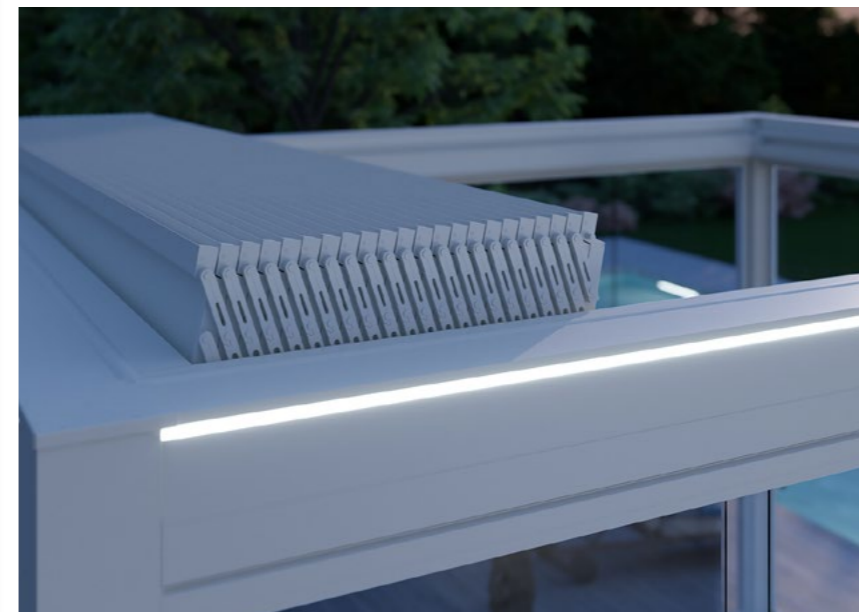

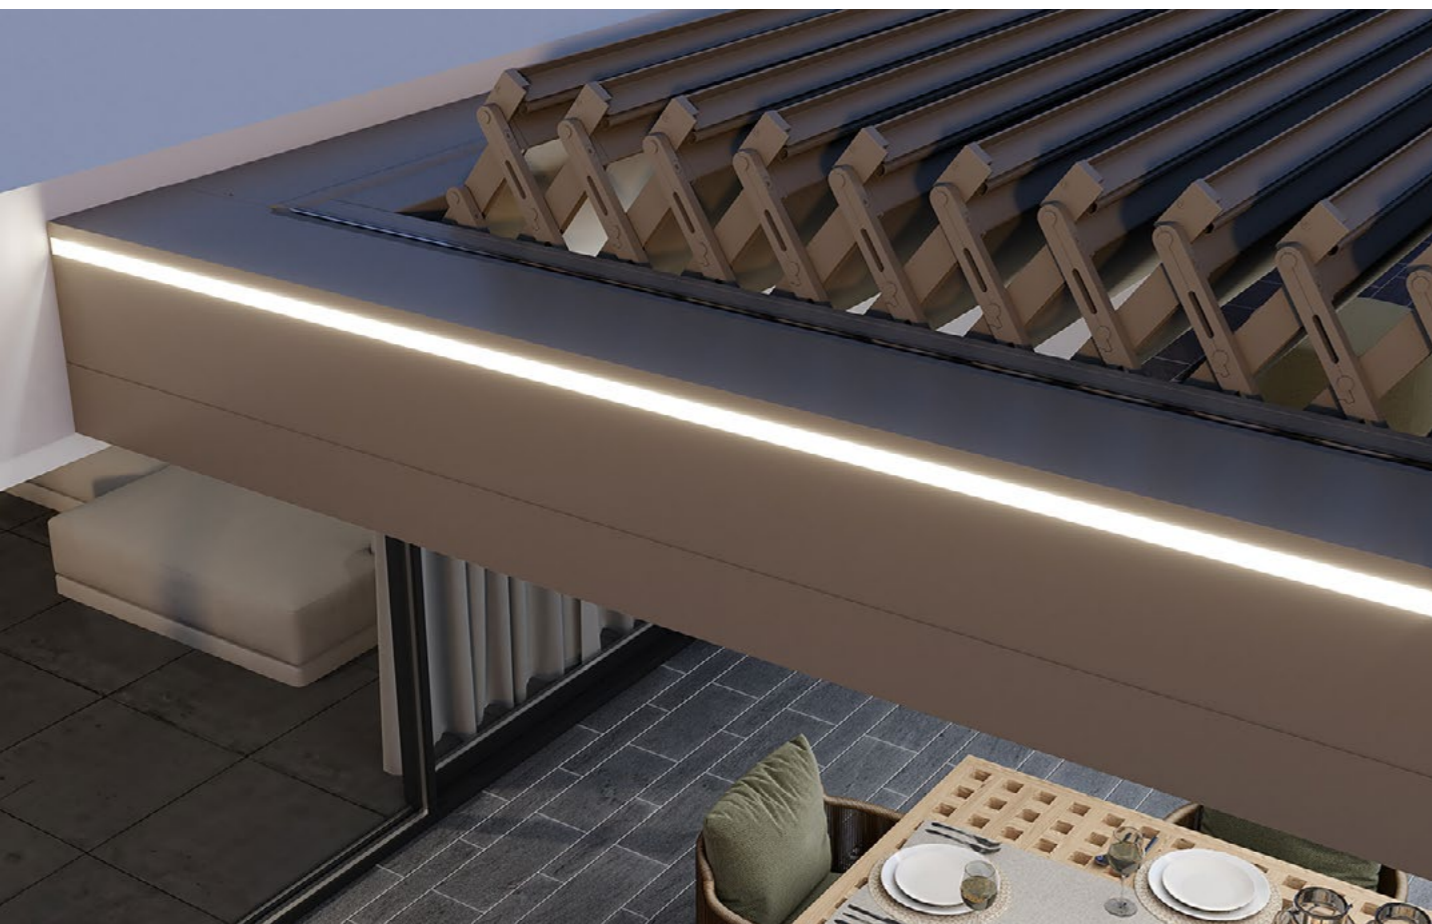

“

*A new way of living
the outdoors in
maximum comfort.*

Design meets functionality

Innovative system

Retractable louver blades, stacked to one side. The louver blades rotate in a single movement closing and opening. Maximum dimensions for a single module: Width 450cm, Projection 611 cm.

Compact sizes

28 Louver blades in the maximum projection. Maximum size of stacked louver blades of 106,6 cm.

Automation

Thanks to combined automated weather sensors of last generation, Kedry Skylife adapts the underneath space to every weather condition (wind, rain, sun).

Modular system

Attachable modules without limits of dimensions in width or projection.

Open or closed?

Kedry Skylife gives the possibility to customize all types of sceneries. Besides the roof cover, also the sides can be opened or closed by equipping the Skylife with integrated drop awnings, sliding glass systems and draped curtains.

Maximum Watertightness

Water flows through the pillars after being conveyed by a system of all around gutters and drainage components. The louver blades offer an integrated water outflow system.

LED Lighting

Lighting with LED strips along the internal and external perimeter.

Change perspective with Kedry Skylife.

A new functionality for new ways of living the outdoors
with maximum comfort.
