## COMMERCIAL & INDUSTRIAL CANOPIES

# KE THE RIGHT CHOICE

SEVEN IMPORTANT REASONS TO CHOOSE KE

KE

KE's experience and strong organization makes us an industry leader in outdoor shading products. KE is part of the BAT GROUP, a multi-national company with sales in 76 countries. This guarantees excellent synergy between innovation, expertise, and choice of materials. KE is always investing in research, product development and employee education in order to improve our products and provide elegant solutions for our customers.

## DESIGN AND CUSTOMIZATION

KE products are custom manufactured to meet your specific requirements.

## INSTALLATION AND SERVICE

KE makes it easy with our 500 affiliates across the US to provide expert guidance, installation and service.

## ITALIAN DESIGN

KE products are beautifully designed in Italy by engineers and designers with decades of experience in the outdoor living space industry.

## MANUFACTURING

Three US production facilities and a total of 9 worldwide ensure that KE can meet all of your requirements for high quality customized shading solutions.

## INNOVATION

All KE shading systems are born from innovative, creative ideas that offer the perfect balance in design and functionality. KE proudly holds 36 patents for our designs.

## QUALITY

KE assures you a quality experience. We have earned multiple worldwide certifications for quality, including CE EN 13561, EN 10901, ISO 9001, ISO 18001 and ISO 14001.

# KE COMMERCIAL

## THE RIGHT CHOICE

Welcome to KE Commercial – Since 1983, KE has earned its place as a leader and innovator in the outdoor commercial shading systems industry. All KE products are meticulously designed with our customer’s design & functional objectives in mind, and produced with a level of quality that our customers have come to trust.

Contact us to learn how easy it is for you to leverage our experience, ability to innovate, and superior craftsmanship to customize and complete your next project.

By using KE canopies, pergolas and motorized screen solutions, businesses can: create “one of a kind”, distinctive retail and commercial facades, increase seating capacity by leveraging outdoor spaces, create welcoming and attractive environments with integrated LED systems, reduce heating and cooling costs, minimize sun glare for a more comfortable environment in all seasons, add motorized automation to make the locale the “go-to” place even when weather changes quickly.

### DISCOVER WHY KE IS CLEARLY THE BEST CHOICE FOR ARCHITECTS, GENERAL CONTRACTORS, HARDSCAPE DESIGNERS AND COMMERCIAL PROPERTY MANAGERS.

- A perfect balance of Italian design, latest technology and functionality
- Nationwide installation available through our network of 500 affiliates
- Industry’s broadest range of Pre-Engineered products with permitting in all 50 states
- Production in the US at KE’s specialized facilities in New York, California and Vermont
- Over 40 years of innovation in global commercial shading systems

## KE COMMERCIAL THE RIGHT CHOICE

KE Commercial will work with you to take your concepts or specified requests to create a.) realistic simulated renderings, b.) engineering & permit models, and c.) production ready drawings for quotation and approvals. Once approved, the canopies or architectural elements are manufactured in our global facilities totaling over 1,146,000 sq. ft. where we guarantee the quality of the entire production process from casting, drawing aluminum profiles, machining components, assembly, final powder coating, and packaging.

**Renderings & Drawings** - To build the best designed and structural supportive awnings KE utilizes the two and three-dimensional attributes of industry standards to communicate design, engineering and permit approval.

**Welding** - The frame fabrication requires many uses of various metals for cost effective results, weight to strength ratios and maximum aesthetic impact. All metal framing is fully welded for superior strength.

**Powder Coating** - To insure the finest in paint finish KE provides powder coating process. This process significantly reduces waste and environmental impact while creating the longest corrosion resistant coating.

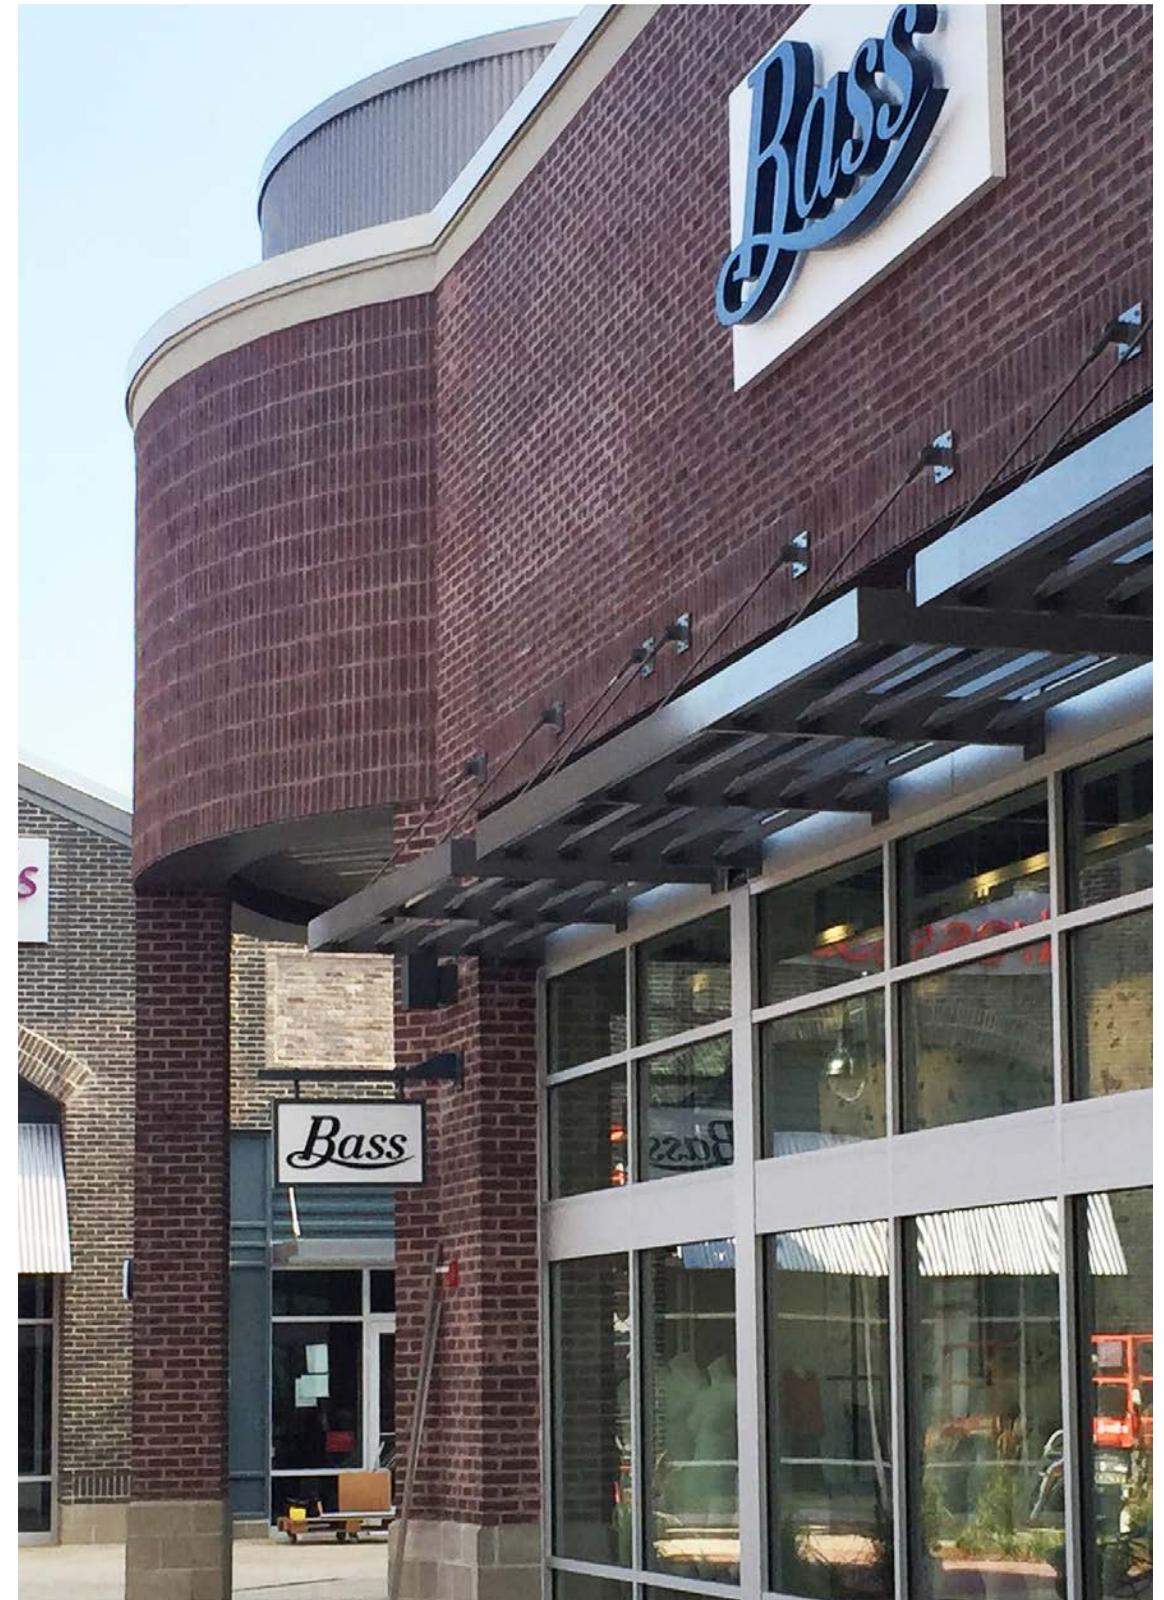

**Fabric Production** - The production of fabric awning covers requires the use of the strongest and most weather resistant seam to create long lasting covers. KE covers are cut and seamed by applying the latest technology in fabric construction by the most experienced craftsmen in the industry.

**Graphics** - Direct full color digital printing on fabric and 3M Sunbrella Graphics System are used to create dynamic fabric graphic treatments that are both superior visually and long lasting. From a one of a kind graphic image to a nationwide branding, KE has the experience and capability to produce quality results.

**Shipping & Assembly** - Having the warehouse space to assemble and store awnings allows KE to protect the awnings and schedule awning delivery on your timeline. KE is not limited by size or scope to address your particular demand.

**Installation** - KE installation personnel have many years of experience and expertise to meet the demand of any size and complexion. KE strives to meet your expectation of time and coordination realizing that awnings are typically one of the last items to complete your project.

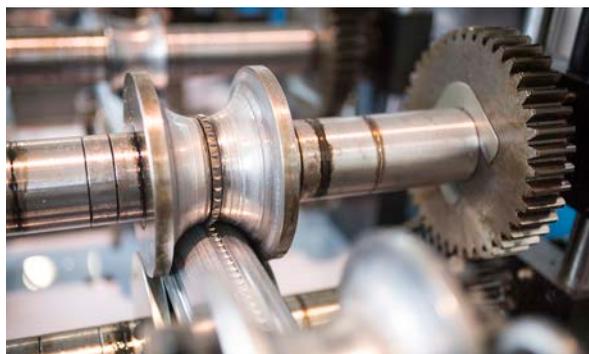

# OUR FACILITIES

With over 1,146,000 square feet of state of the art production floor space worldwide, including 144,000 square feet in our three US facilities, KE produces world-class patio and window awnings that add lasting value to homes and businesses across North America.

Our main goal is to ensure that our customers receive top quality shading systems and for this, we have earned exclusive patents. We are very proud of our company heritage, and take our production systems very seriously.

The strictest oversight organizations in our industry license procedures, materials and production processes. Apart from complying with EC product markings EN 13561 and EN 1090, we have acquired accreditation of international administration, quality and safety systems.

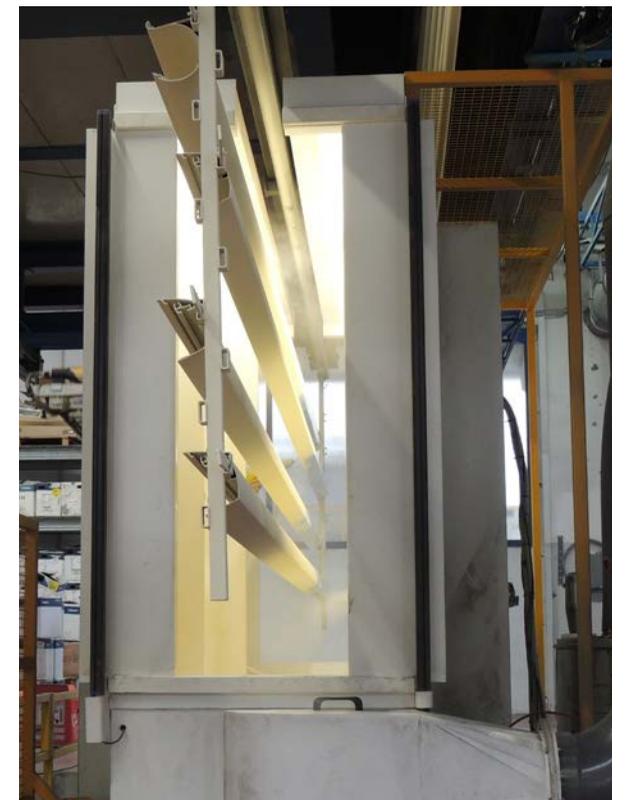

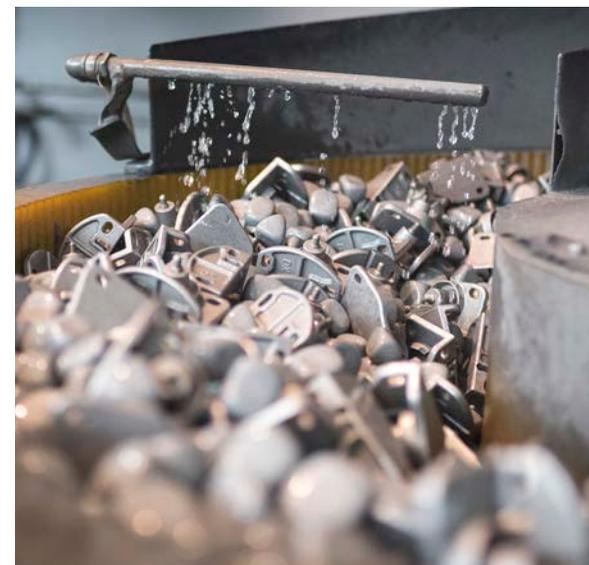

# CORROSION RESISTANCE

Our powder coating process in the United States is certified according to AAMA 2603/2604 specifications. Additionally, KE products have earned the EN 13561:2015 rating, which is the European standard for performance of awnings and blinds designed to be mounted externally to buildings and other construction projects. KE warrants its welded awnings and frames for a period of 10 years. Painted frames carry a 5-year warranty against defects in materials and workmanship.

KE products are made of extruded, powder coated aluminum with corrosion resistant stainless-steel components. Corrosion resistance and protection from the elements is further enhanced by our surface preparation and powder coating process that ensures a strong bond of the paint to the surface.

# HANGER ROD CANOPIES

Hanger rod canopies are an excellent choice for restaurants, outdoor shopping malls, schools and office buildings. With the capacity to hold snow load without the need for vertical posts, these awnings are not only strong and versatile, but also completely unobtrusive and trouble-free.

Constructed from aluminum, hanger rod canopies do not rust and provide many years of maintenance-free service. Easy to install, these canopies are also completely customizable to suit your taste and your business' brand. Add your company's name or logo and phone number to create a powerful marketing tool that identifies your business and draws customers to your location. Larger projections are available upon request.

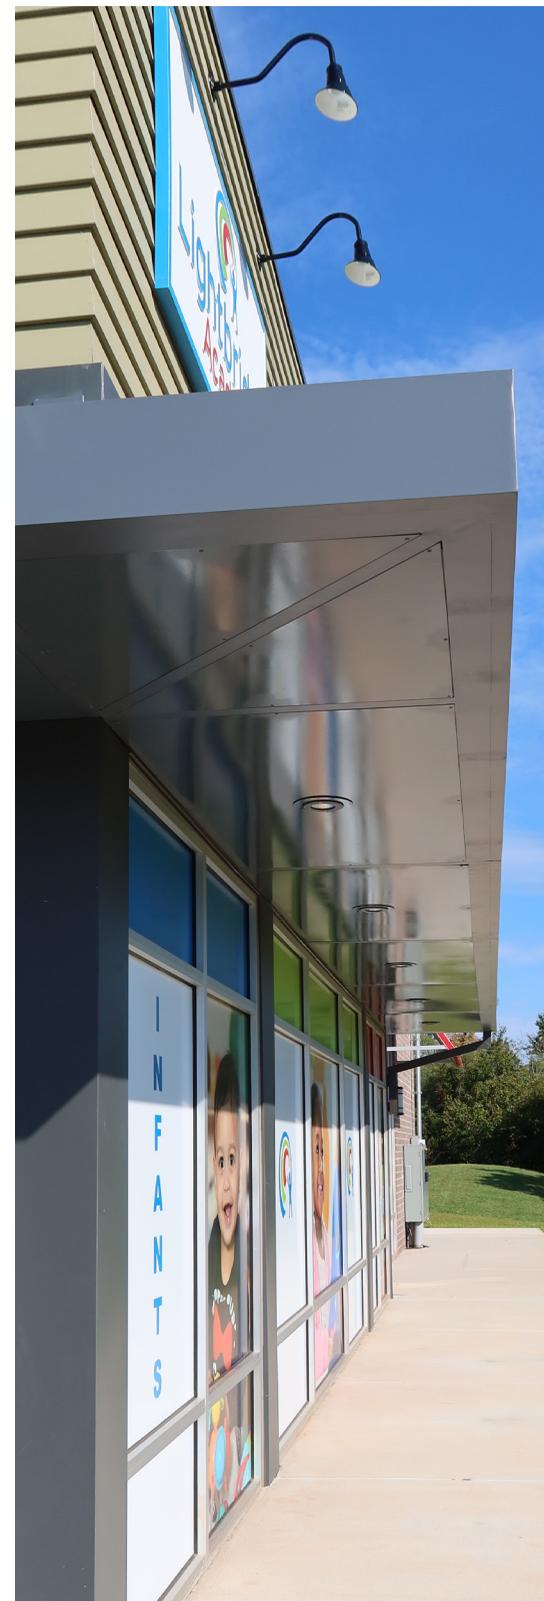

## HANGER ROD CANOPIES

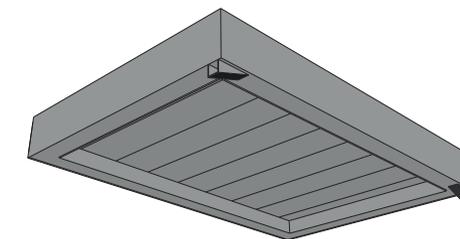

Hanger rod awnings not only work well over doors, but also provide protection from sun and rain at loading docks, over drive-thru areas, and anywhere you want to help keep windows clean from rain and snow. Use hanger rod awnings to increase visibility to identify customer service areas, employee entrances and exit ramps, for example.

KE hanger rod awnings are custom manufactured to your exact specifications and are available in a wide range of high-quality powder coat colors and an array of styles to suit your needs.

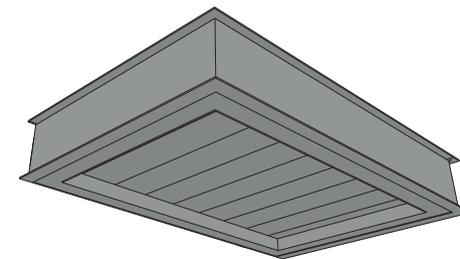

Trust KE Outdoor Design to meet all your commercial shading requirements.

LEARN  
MORE

Aluminum or fabric walkway covers are the perfect solution to keep people walking in and out of buildings from being exposed to a hard rain (or sleet and snow in the winter).

Our custom walkway systems can be designed with a standard, sloped, gabled, or curved architecture style while using high-quality components with a variety of color options and finishes. Our walkway covers are extremely durable and are engineered specifically to meet your exact specifications and local building codes.

We can provide both free standing and wall mounted walkway systems in varying designs from contemporary curved styles to more traditional apex roofed structures, allowing you to choose the walkway to suit your area. All our standard free standing walkway systems can be tailor-made to suit your requirements.

Walkway covers not only shield customers and students from sun and inclement weather; they also provide an attractive accent to a business or facility's overall appearance. Location must be specified at time of order to guarantee snow and wind resistance, and will be dependent on materials choice.
