Bella Plus is beautiful retractable awning that is available with either full cassette or semi cassette options and includes a bottom cover to help protect fabric from the elements. Bella Plus features an expanded projection range up to 13' 5" and can be configured with either a manual or motorized drop valance for additional protection from low-angle bright sun (on models up to 11' 9" projection). Bella Plus has a versatile design that allows mounting to wall, soffit or roof.

Custom colors available only up to 10' 2" projection

Bella Plus shown closed

- The hood and tray design allows the use of Somfy's Torque Sensing Motor Technology. The front rail of the full cassette model will continue to close flush against the cassette housing to prevent any gaps as a result of possible minor fabric stretching. The complete closure will fully retract the awning into the protective case system, keeping your fabric, retractable armature, framework and motor protected from damage due to rain, snow, ice, dust, dirt, squirrels and bird's nests.
- The internal tray supports the roller tube, allowing Bella Plus to accommodate widths up to 26' 0" **without** the need for center support brackets that can damage fabric through friction and abrasion.
- Motorized drop valance available up to 11' 9" projection.
- LED lights are available on all projections.
