Emphasizing light as a decorative element, Vega is unique in its category. With external LED lighting along the rail profiles, Vega provides head-turning style and elegance. Internal lights create a warm, inviting outdoor space to enjoy late into those beautiful, cool evenings.

Multi-colored lighting adds an extra layer of flexibility and fun. Create different moods depending on the event, the time of day, or personal preference. Motorized screens produce a cozy, enclosed space that helps to maximize privacy, reduce late-day sun glare, and block wind when desired.
