Great Horse Country Club, Hampden, MA — The client was looking for an elegant, weatherproof solution to cover their large, outdoor dining space.

The area needed to have a minimally obstructed view of the beautiful grounds with **no support posts** in the middle of the patio. This required a non-standard approach.

KE Custom Solutions designed and produced a large, customized framework (what we call a Tempo) to carry two back-to-back Genius® A2C retractable roof units. Custom posts and headers were designed and constructed to be placed along the perimeter to accommodate the side enclosures, completing the all-weather design of this structure. The open span, retractable roof patio cover was ready for hospitality.

KE Genius® A2C with Custom Support Structure
