Hidden and included Screws and fasteners
into the design

ARCHED ROOF the arched shaped roof allows minimum height overall dimensions and enhances the structure design

The integrated LED spotlights ensure an illumination with reflected light: external, internal

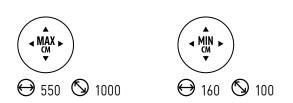

AUTOMATION wind, rain and temperature sensors, together with cutting-edge automation

## **ISOLA 2T**

Solar shading, freestanding or roof mounted, in aluminium with folding curtain.

The sheet - which is taut when fully open - is fixed on arched cross beams and scrolls horizontally on quide-mounted trolleys operated by the tubular motors.

The maximum dimensions allowed are 550x1000 with 300 cm. high pillars. 55 mq coverage area.

The profiles are made of EN AW-6060 extruded aluminium alloy (including the  $5.5 \times 10 \text{ cm}$  guides and  $12 \times 12 \text{ cm}$  columns).

Each module is motorised separately.

It can be mounted as a non-self-supporting structure (models A or T) using steel brackets and hardware. The painting of the interested parties is carried out with epoxy powders based on polyester resin.

The standard colors are RAL 9010 White, RAL 1013 Off-white, RAL 7016 Iron, rough Carbon and rough Corten.

Opatex Flat are the fabrics available as standard.

Additional options include other RAL colors and KE fabbric in the samples.

Furthermore, options are provided to insert LED strips on the internal perimeter of the gutter and calendered arches, in addition to brightness sensors and anemometers, with the option of remotely managing the awning via connection devices upon request.

Possibility of installing lateral closures and sliding glass.

Possible addition of foot with drain and internal corrugated pipe for water drainage.

Wind resistance guaranteed up to class 6 (EN 13561:2015).

GTOT solar shading class (EN 14501:2006) assigned to the fabric.

Product certified with CE marking according to EN 13561:2015

Crossbar profile numbers (terminals included). Maximum interaxis fabric carrying cross bar profiles measure cm 40.

## SURFACE FINISHING

The KE painting process includes high quality standards, with an 8-stage pre-treatment that includes degreasing, deoxidation, and protective treatments before painting. Thanks to this last phase, components and profiles are further guaranteed against particularly severe environmental situations. At the end of the process the profiles and components are painted with polyester resin-based epoxy powders.

Treated components are periodically tested in salt spray according to the ISO 9227 standard to confirm conformity and constistency of the process.

The European product standard EN 13561: 2015 defines corrosion resistance classes of the metal parts that make up the product according to the table below.

Tests performed on the painted components and profiles allow us to classify the product in the maximum class achievable according to EN 13561: 2015, C2 / 4 (48 h - internal components, 240 h - external components).

Equipped with the most modern process control systems including continuous monitoring in which the working parameters are recorded and corrected every 2 minutes, the new painting process guarantees the high quality characteristics of the product while minimizing the risk of environmental pollution.

This is a choice born from the desire to always keep up with technology while guaranteeing operator safety and low environmental impact.

Thanks to nanotechnologies, the implemented coating constitutes an excellent base for anchoring paints, ensuring excellent adhesion and resisting corrosion.

The plant in which aluminum or galvanized steel products with a length of up to 7 meters can be treated, includes 7 treatment tanks, 1 double compartment drying oven, 1 polymerization oven and 1 purification plant for waste water treatment.

The real focus of the plant, however, is the two powder coating booths, each with 4 stations for manual retouching. The booths allow greater production continuity, thanks to a drastic reduction in required stops for color changes.

#### **CORROSION RESISTANCE**

| Classes             | 1  | 2  | 3  | 4   |
|---------------------|----|----|----|-----|
| Internal components | 24 | 48 |    |     |
| External components |    | 48 | 96 | 240 |

### **COLOURS**

When working with color, we know that our whole world is defined by light. And color is nothing more than a breakdown of light. Objects reflect back to our eyes only the color that defines it. This is why it is so important to recognize the close link between color and matter. For this project, there are three keywords that guide the research: Words, Places, Matters. WORDS: Naming colors is important to make them familiar and easily recognizable. places PLACES: Places define colors. Recognizing different of types point defining is starting for and suggesting color combinations. а MATERIALS: Objects do not exist in isolation, but rather match the environment around them: analyzing the materials that make up the environment itself helps us to make decisions; to decide, for example, if the character of a place is false or if instead it is genuinely artistic.

## ENERGY SAVING \_ G TOT

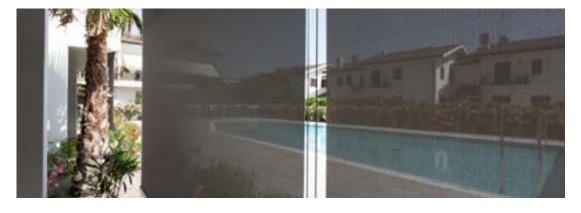

There increasing demand for high-performance buildings have very low consumption and use energy derived from renewable energy sources. In particular, the limitation of solar heat gain is one of the most important aspects of summer thermal comfort. Solar shading plays an essential role in this The gtot value determines the ability of the solar shield to maintain, in an environment directly exposed to solar radiation, a more comfortable temperature than that which would occur with the presence of glass alone. total The solar heat gains are directly proportional to the transmittance solar energy gtot, a value that depends on the glazing and external shielding. The European product standard EN 13561: 2015 and the EN 14501 standard identify 5 energy performance classes as shown in the table below.

| Effect of GTOT on thermal comfort |                     |                  |                    |                 |                     |
|-----------------------------------|---------------------|------------------|--------------------|-----------------|---------------------|
| Gtot value                        | >= 0,50             | >= 0,35 e < 0,50 | >= 0,15 e < 0,35   | >= 0,10 e <0,15 | < 0,10              |
| Class                             | 0                   | 1                | 2                  | 3               | 4                   |
|                                   | very mild<br>effect | Mild effect      | Moderate<br>effect | good effect     | very good<br>effect |

Each KE product has a Gtot value according to the shading fabric / profiles used. For details, refer to the information provided with the technical data sheet of the fabric and the CE label.

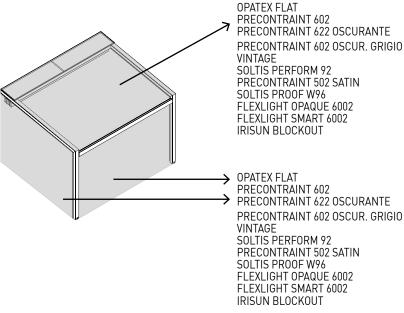

## **FABRICS**

Thermal comfort blends perfectly with beautiful style thanks to the more than 500 high performance fabrics available. A wide variety of colors, styles and solar shading factors allow for a system that meets your specific needs. All fabrics are CE Certified according to the EN 13561 and EN 14501 technical standards.

## OPTIONAL\_LIGHT

Lighting plays a very important role in allowing our pergolas to be used at any time of day. KE uses LED lights, perfectly integrated into the profiles of the structures. LED technology allows for low energy consumption, multiple applications and changes to light color and intensity using a simple remote control.

## **CERTIFICATION**

# ENJOY THE OUTDOORS

## **EN ISO 9001**

KE has adopted a Quality Management System compliant with EN ISO 9001 requirements in order to maintain and increase quality and meet the highest customer expectations. This continuous improvement, through the control of all processes and careful evaluation of risks and opportunities, engages the entire organization in the development of systems to ensure the safety and reliability of the product and in the search for innovative solutions and technologies.

## **OHSAS 18001**

KE has activated a Safety Management System as an integral part of its work organization, committing itself to organizing the entire structure in order to pursue the objectives of continuous improvement in terms of safety and health protection. Training, knowledge and compliance with current legislation on health and safety at work, cooperation and collaboration and preventive activities are actively pursued in order to minimize the prossibility of non-compliance.

## **EN ISO 14001**

KE is ISO 14001 certified for environmental management and strives to be an example of respect for environmental resources and for the continuous improvement of its environmental management system. It is committed to continuous improvement and pollution prevention in compliance with applicable laws, regulations and standards; systematically detects any environmental impact of manufacturing processes, promotes the culture of recovery and recycling in the company and in the related production chain.

## **CE MARK EN 13561**

The CE marking of outdoor awnings is a signal to the Consumer that the product can be sold freely in the EU single market, as it complies with Community provisions which recognize safety as the priority of every product that has this agreed upon reference standard. Verification of wind resistance capacity and the clear indication of the ability of the awning to contribute to the energy savings of the building (Gtot), are some of the commitments that the manufacturer makes to a product that has earned the CE marking. The name of the manufacturer, the reference standard (in our case EN 13561) accompany a product that is properly adapted to European indications.

## CE MARK EN 1090-1

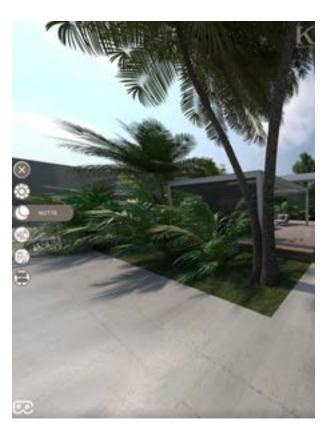

KE extended the CE marking in 2015 to stationary awnings, which are among the aluminum structural components covered by the international standard EN 1090-1. This marking reflects our use of rigorous structural design and manufacturing with qualified processes, adequate industrial resources and qualified personnel.

## **VIRTUAL SHOW ROOM**

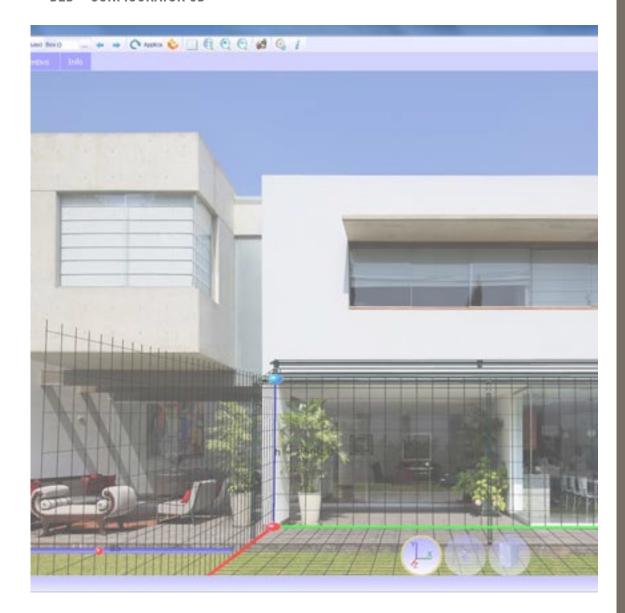

KE has adapted to the new ways of using the product by working on a digital showroom that is able to give the user a high-impact visual experience, a functional space where they can move around freely, receive detailed information on products with a simple click, and access content of interest quickly and intuitively. There is viewable content such as augmented reality and downloadable files such as data sheets, brochures and 3D models.

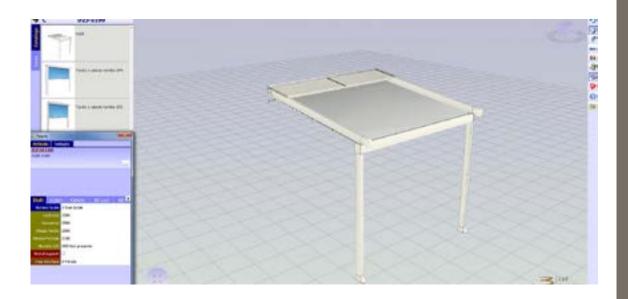

## B2B - CONFIGURATOR 3D

The KE B2B order system is a simple and intuitive service for placing orders conveniently online. An attractive graphic design, numerous functionalities and an easy and intuitive use mode that allows to access in real time to all the information related to the history of the orders and to the processing of the current ones. With the Cad Lite 3D Configurator you can configure Gennius and Bioclimatica models thanks to a constantly updated online catalogue. Thanks to an easy-to-use interface, it also allows you to formulate a complete quote with minimal error.

## SITO - BIM

Home 3: Arcsent

## Ambienti

La mostra missione è creare nuovi spazi outdoor da vivere in totale ammania. Grazie alle nostre coperture solari e elle strutture per externi personalizzate, petrol amediare con stille il tuo terrezza, giardina, attica, mia anche modulare... (1900) til

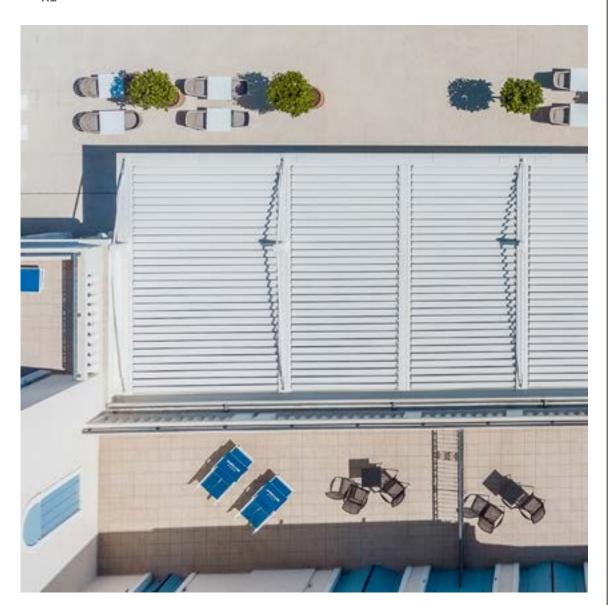

BIM technology improves the working method of designers and is now the main source of information for the realisation of a project. With BIM the model is generated in a "parametric 3D" from which a series of information such as 2D views, elevations, sections but also metric calculations and much more can be automatically derived. On the KE website you can find the BIM gallery of the main KE models, the certifications and all the useful technical documentation for each product:

www.keoutdoordesign.com

## A GROUP, A VISION, A GROUP IN EVOLUTION

Since 1987, KE has been designing and manufacturing arm awnings, cassette awnings, drop awnings, canopies, shelters and is specialised in shading structures that enhance the liveability of outdoor spaces, up to the redesign and restyling of urban furniture. Both for the variety of the range and the depth of the configurations, KE is a manufacturing reality able to satisfy the most demanding requests the most demanding requirements of designers, architects, window and door manufacturers, upholsterers and outdoor professionals.

## Improving the experience

With KE's professionalism and experience you can rely on quality products designed to enhance your customers' outdoor experience. With KE it will be easier to live the outdoor space in perfect harmony with the surrounding environment, widening the viewpoints and ensuring maximum comfort in all seasons.
